Treatment Details:

A holistic and thorough treatment that reduces stress and allows the patient to be pampered at a time of pressure and extreme life forming events. It is the gentle massage of the reflexes of the hands and feet to induce a deep sense of relaxation and encourage the body's self-healing processes to give balance and a sense of well-being. The first treatment requires some form filling and lets the patient know that he/she is being professionally looked after. It is for the management of conditions as well as healing process.
